"FLOWERED DEATH HIDDEN IN THE MIST"

In the far-off distance, the piercing howl of a wolf or ailing hound echoed through the air, sending shivers down our spines. Looking back now, it becomes clear that this haunting cry could have served as a forewarning, urging us to establish our camp and contemplate the true essence of our jungle expedition.

Little did we know that our relentless pursuit of the elusive Atlantean Hall of Records would lead us astray, questioning the very wisdom behind our endeavor.

With unwavering confidence, Seine provided us with reassurance and motivated us to persist until we reached the magnificent San Carlos waterfall, where we would establish our night camp. His words instilled a sense of determination within us, pushing us to continue our journey with renewed vigor.

Exhausted and drenched from the relentless downpour that enveloped the dense jungles of the midlands, we nonchalantly shrugged off our weariness and pressed forward,

venturing deeper into the desolate wilderness of the jungle.

I've never really been a fan of Seine or his Jungle Expeditions, but it's hard to deny that I was intrigued when he showed me the real map his friend Ernest had given him.

To top it off, Seine had also received a massive advance check, the largest I had ever seen at that time.

Back then, $1,000 USD was no small amount.

Still...

Seine has a knack for seamlessly weaving together facts and exaggerations, leaving his audience questioning what is real and what is merely a product of his imagination. Deciphering the line between reality and fiction in Seine's narratives requires a keen eye and a discerning mind, as he expertly blurs the boundaries between the two.

Having spent my formative years in the oilfield of West Texas, I have come to truly comprehend the essence of this sentiment.

It is a place where the art of storytelling reigns supreme, and the truth often takes a backseat to a captivating narrative.

As Mark Twain astutely pointed out, when one disregards the constraints of truth, the realm of possibilities expands exponentially.

I understand, I really do, and it's perfectly fine unless you're willing to invest your money, time, and perhaps even your life into the pursuit of a fundamental truth that Seine is advocating for.

It goes without saying that I have experienced that situation with him in the past, when he managed to persuade both Claudie and me that we could negotiate a separate peace agreement with the Germans.

This occurred as we gazed out at the devastating battlefields of Flanders during the First Great Industrial Slaughter, a term that has been rebranded by the political spin-masters of that time as the Great War or, in American terms, the First World War.

Seine appeared to have a strong network of contacts and was more than capable of negotiating the deal with Imperial Germany.

As a result, we left the battlegrounds and returned to our makeshift base camp in the working-class neighborhoods of Paris, expecting to stay there for the entire duration of the war.

Honestly, I found it quite remarkable that he managed to secure a $1,000 USD deposit from a wealthy and renowned individual who not only agreed to sponsor the entire expedition but also promised, as per Seine, an additional 10% bonus based on the value of the treasures we would uncover.
